

Vehicle Safety Questions – valid from December 4th 2017

“Tell Me Questions”

1. Tell me how you’d check that the brakes are working before starting a journey.

Brakes should be tested as you set off. Brakes should not feel spongy or slack. Vehicle should not pull to one side.

2. Tell me where you’d find the information for the recommended tyre pressures for this car and how tyre pressures should be checked.

These can be found in the manufacturer’s guide (Owner’s handbook) or on a label inside the door frame, use a reliable pressure gauge, check and adjust pressures when tyres are cold, don’t forget spare tyre, remember to refit valve caps.

3. Tell me how you make sure your head restraint is correctly adjusted so it provides the best protection in the event of a crash.

The head restraint should be adjusted so the rigid part of the head restraint is at least as high as the eye or top of the ears, and as close to the back of the head as is comfortable. Note: Some restraints might not be adjustable.

4. Tell me how you’d check the tyres to ensure that they have sufficient tread depth and that their general condition is safe to use on the road.

There must be no cuts and/or bulges, at least 1.6mm of tread depth across the central three-quarters of the breadth of the tyre, and around the entire outer circumference of the tyre.

5. Tell me how you’d check that the headlights and tail lights are working. You don’t need to exit the vehicle.

Explain how you’d operate the switch (turn on ignition if necessary), then walk round vehicle (as this is a ‘tell me’ question, you don’t need to physically check the lights).

Vehicle Safety Questions – valid from December 4th 2017

6. Tell me how you'd know if there was a problem with your anti-lock braking system (ABS).

Warning light should illuminate if there is a fault with the anti-lock braking system.

7. Tell me how you'd check the direction indicators are working. You don't need to exit the vehicle.

Explain that you'd operate the switch (turn on ignition if necessary), and then walk round vehicle (as this is a 'tell me' question, you don't need to physically check the lights). You can also do this using the hazard warning light switch.

8. Tell me how you'd check the brake lights are working on this car.

Explain that you'd operate the brake pedal, make use of reflections in windows or doors, or ask someone to help.

9. Tell me how you'd check the power-assisted steering is working before starting a journey.

Before starting a journey, 2 simple checks can be made.

Gentle pressure on the steering wheel, maintained while the engine is started, should result in a slight but noticeable movement as the system begins to operate. Alternatively turning the steering wheel just after moving off will give an immediate indication that the power assistance is functioning.

If the steering becomes heavy, the system may not be working properly.

10. Tell me how you'd switch on the rear fog light(s) and explain when you'd use it/them. You don't need to exit the vehicle.

Turn on ignition (if necessary) and then turn on dipped headlights. Operate fog light switch and check warning light is on. Explain use (visibility reduced to less than 100m)

11. Tell me how you switch your headlight from dipped to main beam and explain how you'd know the main beam is on.

Turn on ignition or engine on (if necessary), Operate switch and check main beam warning light is on (blue light).

Vehicle Safety Questions – valid from December 4th 2017

12. Open the bonnet and tell me how you'd check that the engine has sufficient oil.

Identify dipstick/oil level indicator, describe checking oil level against the minimum and maximum markers.

13. Open the bonnet and tell me how you'd check that the engine has sufficient engine coolant.

Identify high and low level markings on header tank where fitted or radiator filler cap, and describe how to top up to correct level (ONLY when engine is cold).

14. Open the bonnet and tell me how you'd check that you have a safe level of hydraulic brake fluid.

Identify brake fluid reservoir and explain that you'd check level against high and low markings.

“Show Me” Questions

Note: The examiner will ask you one of the following questions. For test purposes these actions must be carried out on the move.

1. When it's safe to do so, can you show me how you wash and clean the rear windscreen?
2. When it's safe to do so, can you show me how you wash and clean the front windscreen?
3. When it's safe to do so, can you show me how you'd switch on your dipped headlights?
4. When it's safe to do so, can you show me how you'd set the rear demister?
5. When it's safe to do so, can you show me how you'd operate the horn?
6. When it's safe to do so, can you show me how you'd demist the front windscreen?

Vehicle Safety Questions – valid from December 4th 2017

7. When it's safe to do so, can you show me how you'd open and close the side window?
